### **PNG Ports raises awareness and draws Face Mask Policy on Swine Flu**

PNG Ports Corporation is raising an awareness and has drawn Management Containment Strategies on the Swine Flu outbreak at its major port facilities in the country.

The Containment Strategies is for precautionary measures for workers at the waterfront to better protect themselves and their family from contracting the flu that has already infected more than 150 people worldwide.

The Policy is further aimed at maintaining a clean, healthy environment from airborne diseases and pandemics that may pose a health, safety and environment risk to its employees, shipping agents and other port users.

Waterfront workers include PNG Ports Staff, shipping agents and other port users who have direct contact with visitors arriving on international vessels at major port facilities in the country.

PNG Ports Corporation has taken this initiative and is committed to conducting business responsibly in a healthy and environmentally friendly manner in all its port facilities for the benefit of its employees and stakeholders.
